

SAS® GRID

Enterprise Scalability and Performance

Integrate your Enterprise

WORKLOAD MANAGEMENT
HIGH AVAILABILITY
INCREASED PERFORMANCE

SAS® Grid Manager

KEY BUSINESS BENEFITS

- Lay the foundation for processing Big Data with SAS®
- Leverage your “know how” in SAS® and reduce your Total Cost of Ownership as you scale over time!
- Centralize Management/Administration on commodity hardware
- Expand the Usability and Availability of your Resources throughout your system

UPGRADE to a system that provides you with:

✓ **A managed, shared environment** – delivers **high speed**, enterprise-class dynamic workload balancing for **unlimited user groups**.

✓ **High availability** – includes several high-availability capabilities **for all critical services**.

✓ **Grid-enabled SAS®** – provides **maximum processing efficiency** with minimum user intervention.

✓ **Real-time monitoring and administration** – includes an interface for configuring and **managing high-availability services**.

✓ **A flexible infrastructure** – allows you to add computing resources **incrementally** using **commodity components** as needed to meet changing demands.
